Northland Treatment Center
Staff physician
Start Date: 5-31-16 to 7-31-18
Addiction Medicine 5 hours/week

Hours in Practice
Direct Patient Care
Activity: Medication Management of Addiction
5 hours/week
Working weekly in an addiction medicine tx center:

Tx'd patients with OUD and other addictions, primarily for MAT. Worked with other physicians, nurses, counselors. Saw new and follow up patients, generally 10-15 patients every week in 5 hours. I assessed their recovery and reviewed their POC and confirmation UDS and their PDMP. I prescribed bupronorphine to most of my patients and tapered some. I reviewed counselor notes and referred for tx of co-morbid conditions, including hep C and mental health. Some patients were treated with naltrexone. I reviewed participation in group therapy and 12 step groups. Some were evaluated for withdrawal and intoxication and required discharge.

Practice

Emergency Physician
Staff physician
Start Date: 6-1-12 to 8-30-14
Addiction Medicine 6 hours/week

Direct Patient Care
Activity: Other
6 hours/week

Addiction Medicine Practice in the Emergency Department:
From 2012-2014 I worked 6-12 hr shifts in the ED and saw 15-40 patients/shift. 80% or more of the population suffered from SUD. Many were in withdrawal and were counseled on SUD and tx options. I worked with nurses, PAs and pre-hospital care to educate them on the disease of addiction. Patients also presented with intoxication requiring treatment. Many requested opioids and I reviewed the PDMP and discussed the fact that there was a concern of SUD. I suggested 12 step groups and treatment to some. Speaking with the leaders of ASAM, they suggest that 40 % of most emergency medicine practice consists of addiction medicine-related care.

Board of Directors, ACMT
Position
Start Date: 10-1-08 to current
Addiction Medicine 2 hours/week

Research/Training/Administrative
Activity: Administrative appointments
5 hours/week

Board of Directors and Executive Board (500-1000 hours): VP vice-president, president, and am now the immediate past president. Addiction medicine is a major focus of our activities. I have spoken on the topic, am an active member of the addiction medicine committee, attend monthly addiction rounds, have been involved in several meetings to secure funding for and to plan educational activities surrounding addiction medicine. We have hosted conferences on, multiple symposiums on setting up practices as well as research in addiction medicine. We have presented events to encourage and educate medical toxicologists on pursuing addiction medicine certification. Much of our recent time has been dedicated to the opioid epidemic.

Research/Training/Administrative
Published work
5 hours/week

Senior editor of textbook: *"Case Studies in Medical Toxicology," From the American College of Medical Toxicology,* published in 2017. 5 of 28 cases directly related to addiction medicine.

Research/Training/Administration
Activity: Published Work
35 hours/week

I am the leader of a team of 15 full time members and some contractors to produce point of care content for Elsevier's ClinicalKey and approximately 20% is related to addiction, including alcohol, nicotine and other agents. I am the curator of Elsevier's opioid epidemic resource center, which is free to the public: https://www.elsevier.com/connect/opioid-epidemic-resource-center/_nocache. I have written and been interviewed extensively and published on the internet regarding the opioid epidemic, including an interview with CNN online and other national publications. There are 10 online pieces listed on Elsevier's opioid epidemic resource center. This constitutes approximately 10% of my job.
