President’s Perspective
Cycling Diary
Leslie R. Dye, MD, FACMT
President

As many of you who listen to the JMT podcast know, I listen while I ride my bike—only one earbud in for safety’s sake.

While I am confident the new hosts will do a wonderful job, I was sad to listen to the final podcast by Howard Greller, MD, FACMT and Dan Rusyniak, MD, FACMT. Between fishing vest pockets, you ate what, sad animal stories, and hearing babies crying and dogs barking in the background, I thought they made an outstanding team. Many passersby wonder about the crazy lady laughing out loud while she bikes down the country roads. My technical skills are only mediocre but I have a slight understanding of what it takes to edit a podcast and I know it takes many hours of work.

I still had about 12 miles left to ride at the end of the podcast and was thinking about all the volunteer service work our members do. Maybe because I am at the stage in my career where I don’t worry about my curriculum vitae (even if I take out the padding), I am amazed at the time many spend volunteering for the sake of the College. There are so many members who dedicate a huge amount of uncompensated time working for ACMT to keep all of our activities running smoothly, often without overt recognition. In addition to the member volunteers, the staff members also contribute time well beyond expectations. While it should appear that everything moves smoothly to the members in a well-run organization, I can’t help as president but emphasize the behind the scenes work that occurs. To start naming all of the contributors would take too long, and I am sure I would leave out many. My concern, as I finished my bike ride, was whether or not we have younger members who are willing to selflessly contribute to improve the future of medical toxicology?

At our board retreat in Phoenix in January, we discussed the values of the College. I suggested that joy and passion are part of what we on the board of directors value. The more time I spend
with medical toxicologists, fellows, residents, and students interested in medical toxicology, the more I realize what a unique group we are. Many are brilliant and most are passionate about our specialty. Some are quirky with odd senses of humor. But I believe the combination of intellect, drive, and humor attracts new members to the specialty. I also reviewed the most recent slate of board nominees and realized that our specialty and College are in good hands. We have great people to choose from; it is unfortunate that they can’t all be elected. We will be soliciting members to join committees again soon and I encourage you to get involved. My involvement with ACMT started as a member of the education committee. My joy and zeal for our specialty has not only continued since my days as a committee member, but has grown and deepened as I continue to work with the incredible staff and members. Please join at least one committee in ACMT. I promise you will benefit, both personally and professionally, even if it is just watching the interactions of our wonderful members!

Welcome New Board Members

The results are in! We are pleased to announce the results of its 2016 election to fill seats on the ACMT Board of Directors. Those joining ACMT’s leadership are Diane Calello, MD, FACMT; Bryan Judge, MD, FACMT; and Ayrn O’Connor, MD, FACMT. The new members will begin their new terms of service following the board meeting at NACCT in September 2016. Please join us in congratulating our new Board Members!

We’d also like to welcome Henry Swoboda, MD from the Toxikon Consortium Medical Toxicology Fellowship Program in Chicago, IL as the 2016-2017 Board Intern.

Diane Calello, MD, FACMT  
Bryan Judge, MD, FACMT  
Ayrn O’Connor, MD, FACMT

GET INVOLVED!

Our members are the lifeblood of our organization and you are always invited to become a more active member by joining a Committee or Section.

Click on the links below for a description of each group. Email info@acmt.net to join any ACMT committee or section.

2016 ACMT Recognition Award Honorees

During the Annual Scientific Meeting, ACMT honored the following members who have made significant contributions to the College or to the specialty of Medical Toxicology.

Outstanding Service to the College
William P. Kerns, II, MD, FACMT

Significant Contributions to the Educational Pursuits of Medical Toxicology
Steven C. Curry, MD, FACMT

Significant Research Contributions in the Field of Medical Toxicology
Jerrold B. Leikin, MD, FACMT

Dr. Leikin will receive his award at NACCT in Boston, MA

Highlights from the 2016 ACMT Annual Scientific Meeting

ASM Poster Session

Wendy K. Chung, MD, PhD (left), and Ayrn O’Connor, MD, FACMT present during the 2016 ACMT ASM

PEHSU Staff (from left): Carrie Dickenson, Amanda Allen, Lizzy Nguyen

Tricia Smith, MBBS
Scholarship for Underrepresented Minority Medical Trainees Awardee

Adrienne R. Hughes, MD
Michael P. Spadafora Awardee

Leslie Dye, MD, FACMT honors William (Russ) Kerns, II, MD, FACMT

Leslie Dye, MD, FACMT honors Steven C. Curry MD, FACMT
2016 FACMT Inductees

The following ACMT members were awarded Fellow status (FACMT) and recognized at the Business Meeting during the 2016 Annual Scientific Meeting.

ACMT Educates
Louise Kao, MD, FACMT, Education Committee Chair

Thank you to all who helped make our Annual Scientific Meeting a great success! We had outstanding education, networking, and warm weather in Huntington Beach, California.

Looking ahead to fall, this year NACCT will be held in Boston, MA from September 12 - 16, 2016. Our PreMeeting will be held on September 13, 2016. Please join us to learn about “New and Novel Rx: Drugs, Antidotes, and Delivery Systems” as well as many other cutting edge symposia. Registration is open now for NACCT.

Save the date for our 2016 Medical Toxicology Board Review Course! This will be held Thursday, September 29- Saturday, October 1, 2016 at the Hilton Salt Lake City Center in Salt Lake City, Utah. As always this highly rated course will offer great speakers, teaching and study guides, and quiz questions.

The Education Committee has been restructured into working groups as follows:

- **Annual Scientific Meeting**: 2017 Chairs: Andrew Stolbach, MD, FACMT & Bryan Judge, MD, FACMT
- **NACCT**: 2016 Leader: Christina Hantsch Bardsley, MD, FACMT
- **Board Review Course**: Leaders: Patrick Daubert, MD, FACMT, Evan Schwartz, MD, FACMT & Michael Levine, MD, FACMT
- **Forensic Course**: Leader: Lewis Nelson, MD, FACMT
- **Webinars**: Leader: J.J. Rasimas, MD, PhD
- **Evaluations**: Leader: Bryan Judge, MD, FACMT
- **Needs Assessment/CME**: Leader: Ziad Kazzi, MD, FACMT
- **The Next Big Thing**: Leader: Chuck McKay, MD, FACMT
- **Enduring Education**: Leader: Paul Wax, MD, FACMT

Thank you to the working group leaders for their efforts thus far and for their leadership and involvement! All current education committee members have been assigned to one or two working groups. If you desire to participate in a working group, please contact Louise Kao, MD, FACMT at lkao@iuhealth.org.

For the Annual Scientific Meeting 2017, we will return to San Juan, Puerto Rico from March 30-April 2, 2017. The Satellite symposium will discuss the epidemic of addiction and prescription opioid abuse, and the main meeting will focus on maximizing the impact of toxicology.

Don’t miss the ACMT Grand Rounds webinar, held every second Tuesday on months opposite National Journal Club. This series highlights speakers outside of medical toxicology sharing their expertise on a diverse array of topics. If you have a suggested speaker, please contact J.J. Rasimas, MD, FACMT at joseph.j.rasimas@healthpartners.com. Also the National Journal Club and National Case Conference webinars continue to provide stimulating discussion of our toxicology literature and fascinating cases. Please view the conference calendar here for dates and times.

Other inductees not pictured: Nicholas Buckley, MD; Richard Church, MD; Andrew Dawson, MBBS; Sophie Gosselin, MD; William Holubek, MD; Jenny Lu, MD; Gerald Maloney, DO; and Winai Wananukul, MD.
Medical Toxicology Board Review Course

Registration Now Open!
September 29 - October 1, 2016
Hilton Salt Lake City Center, Salt Lake City, UT

- The only professional association that focuses solely on medical toxicology.
- Be informed by nationally recognized, multidisciplinary medical toxicology faculty.
- Study content specifically designed for the medical toxicology subspecialty exam offered jointly by ABEM, ABP, and ABPM.
- Gain new insight into current clinical issues, particularly those not seen in your daily practice.
- Optimize your retention of factual knowledge as the course is conveniently scheduled close to the board exam date.
- Strengthen your practical knowledge in key subjects by attending the “stimuli” room with clinical images and case based modules.
- Benefit from an intensive learning environment that prepares you for your board subspecialty exams.
- A complete electronic syllabus with over 700 practice questions (and answers) will be available to all who register for this course.

REGISTER NOW

MTFITA Update

During the 2016 Annual Scientific Meeting, fellow members of ACMT appointed the following four individuals to lead the Medical Toxicology Fellow-in-Training Association (MTFITA).

President: Sean Boley, MD, HealthPartners
Vice-President: Dalia Al Wasiyah, MD, Carolinas HealthCare
Officer: Joshua Shulman, MD, University of Pittsburgh
Officer: Abby Montague, MD, HealthPartners
Officer: Kathy Vo, MD, University of California, San Francisco

Please click here to learn more about the MTFITA and opportunities available to our fellow members!
On behalf of the Clerkship Council on Medical Toxicology (CCMT), we are pleased to share the following updates:

The Medical Student Track at ASM was a success! It was held in collaboration with the University of California at Irvin Emergency Medicine Interest Group. A warm thanks to our engaging speakers (Michele Burns, MD, MPH, FACMT; Stephen Munday, MD, MPH, FACMT; Cyrus Rangan, MD, FACMT; Jeffrey Suchard, MD, FACMT; David Tanen, MD, FACMT and Christian Tomaszewski, MD, FACMT) and to the medical students who dedicated their Saturday afternoon and braved the LA traffic to attend and actively participate in the discussion. (Pictured left)

Stay tuned for our Medical Student and Resident Track that is already in development for Puerto Rico in collaboration with the American Academy of Emergency Medicine (AAEM) Resident and Student Association as well as the AAEM Diversity and Inclusion Task Force. Please share suggestions regarding next year’s track to zkazzi@emory.edu.

We are updating the Clerkship Directory information in collaboration with the various clerkship directors. Please review your site information on a regular basis and email any updates to info@acmt.net.

CCMT will participate in a National Medical Student webinar that is being organized by Dan Sudakian, MD, FACMT to introduce medical students to the field of medical toxicology. Stay tuned for more information!

CCMT member, Robert Bassett, DO is leading the development of a new educational resource for medical student educators that will be titled CSI Tox (Case Series in Toxicology). He is backed up by Ayrn O’Connor, MD, FACMT in the role of co-editor. CCMT is also developing a question bank and compiling online resources that will be available to medical students and medical student educators. Stay tuned for more information!

Finally, we would like to welcome to CCMT our Medical Student Member Rennie Burke (MS1 at UC Riverside). He will enrich our group with his energy and enhance our ties with our medical student members.

We look forward to your suggestions and active participation! Remember to communicate through the Forum and check out our webpage which is currently in development!
Research Committee
William Russ Kerns, MD, FACMT, Research Committee Chair

Highlights from the 2016 ASM and future opportunities by and for the members:

ORIGINAL RESEARCH PRESENTATIONS AT 2016 ASM

Research presentations at the 2016 ASM Huntington Beach, CA: 121 abstracts were presented at the ASM, including 14 oral platforms. The abstracts consisted of 70% research and 30% case reports and are available for review in the Journal of Medical Toxicology (J Med Toxicol 2016;12:3-47).

Kathryn Katzung, MD, HealthPartners Institute for Education and Research, Regions Hospital, was awarded Best Platform 2016 for her MTF-funded research presentation entitled “Randomized Controlled Study Comparing High Dose Insulin (HDI) to Vasopressors or Combination Therapy in Refractory Toxin-Induced Cardiogenic Shock (TICS)”

Congratulations to Dr. Katzung and colleagues!

Planning is already underway for abstract submissions for next year. The abstract submission period for the 2017 ASM San Juan, Puerto Rico is: September 1 – November 15, 2016. A preliminary call for abstracts will be released summer 2016.

Thanks to Eric Lavonas, MD, FACMT for leading the abstract process (his 4th year!), Mark Mycyk, MD, FACMT for his assistance with abstract publication in JMT, the platform moderators, and the abstract reviewers that made the presentations a success.

Special thanks to ACMT staff – Tricia Steffey, Lizzy Nguyen, and Tara Frutkin for their behind the scenes efforts with the submission and presentation process. They assumed responsibility for the administration of the abstract process upon Jim Wiggins’ unfortunate death and really made the transition seamless!

FIT RESEARCH FORUM AT 2016 ASM

The goal of the event is to provide fellows with an opportunity to network with experienced faculty, hone public speaking, and receive constructive feedback that can strengthen their proposed research. Eight Medical Toxicology Fellows presented a broad range of potential projects that included:

- Sean Boley, MD, Hennepin Regional Poison Center: Physostigmine is an effective antidote for the anticholinergic toxidrome
- James Chenowith, MD, University of California-Davis: L-Carnitine for the treatment of valproic acid overdose: An instrumental variable analysis
- Peter Chai, MD, University of Massachusetts: Naloxone distribution patterns in patients with a history of injection drug use
- Lindsey Fox, MD, New York University School of Medicine: Smartphone App for addiction recovery and research
- Matthew Griswold, MD, University of Massachusetts: Using a naloxone trigger tool to identify pediatric patients at risk for child maltreatment and neglect.
- Nadia AL Hajri, MD, Emory University: To study the efficacy and adverse reactions of using polyvalent snake antivenom in all kinds of snakebites in Oman
- David Liss, MD, Washington University School of Medicine: Potential false positive immunoassay urine drug screening for benzoylecgonine in patients taking levomilnacipran
- Morgan Riggan, MD, New York University School of Medicine: Prescription opioids as a gateway to heroin use

The Research Committee thanks Michael Levine, MD, FACMT for organizing the event (his 3rd year!) and Drs Kao, Kerns, Lavonas, Levine, Rusyniak, and Stellpflug that served as panelists/reviewers for the session. The committee and meeting organizers would also like to recognize and thank McNeil Pharmaceutical for their continued financial support of the forum. McNeil generously offers a travel scholarship for selected presenters.
**Addiction Medicine Section**

A Snapshot of an Inpatient Addiction Medicine Consultation Service  
**JoAn Laes, MD, Co-chair Addiction Medicine Section ACMT**

In 2014, an estimated 21.5 million persons aged 12 or older had a substance use disorder in the past year (“Behavioral health trends in the United States: Results from the 2014 National Survey on Drug Use and Health,” 2015). People with substance use disorders have health care costs that are more than twice as high per year than people without these disorders (Druss and Rosenheck, 1999). An urban teaching hospital in Minneapolis, Minnesota identified drug and alcohol dependence as one of the top three diagnoses in patients who were deemed to have greater risk of high healthcare costs within the institution. To address the significant healthcare costs and to provide quality care to patients with substance use disorders, an addiction medicine consultation service was developed.

The addiction medicine consultation team, comprised of a physician board-certified in addiction medicine, medical toxicology, and internal medicine; an advanced practice provider (APP); and three licensed alcohol and drug counselors (LADC), provides consultation services to the emergency department, inpatient medical-surgical units, and inpatient psychiatry units of the 500 bed hospital. In one month, the LADC consulted on an estimated 250 patients, with 50 of those patients also seen by the physician or APP.

Over half of the consultation requests are from inpatient medicine teams. About 75% of the consultations identify alcohol as a substance currently used by the patient, the next most commonly identified substances include opioids (20%), stimulants (20%), cannabis/cannabinoids (14%), and sedative-hypnotics (8%). The majority of consult requests to the LADC were to provide brief intervention and referral to treatment. Of the medical consultants to the physician/APP, about 50% of the requests for alcohol use disorder pharmacotherapy (initiation of naltrexone or acamprosate), 20% for management of alcohol withdrawal, 20% for management of opioid withdrawal (10% resulting in initiation of an opioid agonist treatment), 8% for management of sedative-hypnotic withdrawal, and 8% for evaluation and management of overdose or altered mental status.
In one month, the physician charged 47 encounters (124 relative value units) and the APP charged 63 encounters (173 relative value units). The majority of these encounters were coded as initial inpatient consults levels, followed by subsequent hospital care levels (see Figure 1 for details on number of charges per service code). Total charges for the month were $33,635; payments amounted to $3,460 with $10,000 in additional contractual adjustments (payor mix for the hospital population is 45% Medicaid, 28% Medicare, 20% private insurance, and 7% uninsured).

With growing awareness and utilization of the consult service, potential monthly production is 400 relative value units, yielding an estimated $27,000 in monthly collection ($326,000 yearly) as predicted by the American Medical Group Management Association. The physician on the team also provides services at the institution’s opioid treatment program, which allows a portion of the physician salary to be offset from the consult service. Administrative support for the service is an indirect cost from the medicine and addiction medicine departments; support for physical locations and technological resources is provided by the hospital. Although it is too early to calculate, additional cost savings will also certainly be realized by an anticipated reduction in substance use disorder related inpatient readmissions with increased engagement in outpatient substance use disorder treatment and primary care resources.

Due to a large percentage of hospitalized patients with substance use disorders and the associated high healthcare costs, an inpatient addiction medicine consult service was developed to address the complex medical problems associated with substance use. The consult service is on target to achieve financial self-support while providing cost-effective and quality care for patients with substance use disorders.

![Figure 1: Number of Charges per Service Code January 2016](image)

The JMT editorial board enjoyed catching up in the sun during the Annual Scientific Meeting Bench to Bedside: Neurologic and Metabolic Toxins in Huntington Beach, California. For those who were unable to attend the meeting, the abstracts can be viewed in the March 2016 issue of JMT.

While it often marks the beginning of spring, the Annual Scientific Meeting is also a point of transition for our JMT Fellow-in-Training members. We would like to thank Gillian Beauchamp, MD from Oregon Health and Science University and Peter Chai, MD from the University of Massachusetts for their outstanding service as the 2015 FIT editorial board members. Both Gillian and Peter completed innovative projects that will improve the quality and future visibility of JMT in addition to their other FIT duties. As sad as we are to say goodbye, we are excited to welcome our new 2016 FIT editorial board member, Rachel Wightman from New York University School of Medicine.

In other news, we are thrilled to announce the new duo of Jeff Lapoint, DO and Gregory Lasala, MD who are officially taking over the JMT podcast. We cannot thank our original podcasters, Howard Grellar, MD, FACMT and Dan Rusyniak, MD, FACMT enough for the hours of excellent entertainment and education they provided via the JMT podcast over the last five years. Please tune in to listen to the new JMT podcast 2.0.

As we strive to increase our accessibility to readers, JMT is also working hard to expand our social media presence. Over the next year we will collaborate with the ACMT Public Affairs Committee to host social media events like the recent #firesidetox chat. For those of you tuned in to discuss lead poisoning on the first ever ACMT Twitter #firesidetox chat, thank you! Your participation and contributions made this event a huge success. We look forward to discussing poignant toxicology topics and JMT articles in future ACMT Twitter chats. If you have any feedback or suggestions for future #firesidetox events please reach out to us at jmtinfo@acmt.net.

Remember, JMT is now an online-only journal. If you haven't done so already, please download the App to enjoy easy electronic reading anywhere. For those returning from spring break or ACMT that are looking to submit your post-meeting manuscripts, please consider submitting to JMT.

As always please contact us as jmtinfo@acmt.net with questions or concerns or follow us on Twitter at @JMT_Tweets for the latest JMT updates.
ACMT International Committee
Ziad Kazzi, MD, FACMT and Rais Vohra, MD, FACMT, ACMT International Committee Co-Chairs

On behalf of the International Committee, we are pleased to share the following updates:

The ACMT International Committee has developed a Strategic Plan that will be presented to the Board of Directors for approval. We hope to share it with you at our next communication.

The topic of the Annual Fellows-in-Training Luncheon Presentation at ASM was Global Toxicology: Trends, Gaps and Opportunities. This was followed by a National Grand Round Webinar on April 12, 2016 that discussed the CDC activities in Global Health and ways that medical toxicologists can get involved. If you have missed this webinar, make sure you watch it in the online archives.

We continue developing a Global Toxicology Educational Toolkit and we need your help and ideas! Similar to other one day courses, this ACMT product will be a portable curriculum of best practices for poisoned patients in middle- and low-income countries that can be taught in 1 full day. We will be working to develop this as a multimedia project, including slide sets and simulation/workshop materials. If you would like to develop or contribute a lecture or simulation/workshop materials for this exciting initiative, please contact us for further information. (zkazzi@emory.edu or raisvohra@hotmail.com). Dr. Cynthia Santos has received a grant from Emory University to deliver some of the developed modules in Spanish in May 2016 in the Dominican Republic. She has developed a Toxicology Curriculum in Spanish available on our website here.

Rais Vohra is organizing an ACMT symposium at the upcoming APAMT meeting in Singapore. Contact him with any suggestions or questions.

Finally, here is a list of upcoming conference that ACMT International Committee will participate in.

  o Dr. Suzanne White and Dr. Ziad Kazzi participating

- INDUSEM Annual Conference in Bangalore, India – October 16-20, 2016 http://www.indusem.org/indusem2016/
  o Dr. Ziad Kazzi participating

- Asia Pacific Association of Medical Toxicology – Singapore – November 2016 http://www.apamt2016.com/
  o Dr. Rais Vohra and Dr. Rittirak Othong participating

- Middle East North Africa Toxicology Association Annual Conference – UAE, February 2017
  o Dr. Ziad Kazzi Point of Contact

- Mediterranean Emergency Medicine Congress – Lisbon – September 7-11, 2017
  o Dr. Ziad Kazzi Point of Contact

ACMT members in good standing (and preferably those with FACMT status) who are interested in being on our International Speaker’s List are invited to review the requirements and complete the online application form posted on the ACMT International Committee webpage. Click here for more information and online application.

We look forward to your suggestions and active participation! Remember to communicate through the International Committee Forum as well!
Pediatric Environmental Health Specialty Unit (PEHSU) Program
Carrie Dickenson, PEHSU Program Manager

PEHSU National Classroom - Upcoming training opportunities
The PEHSU program recently completed development of a two-part course: Pesticides and Child Health. The modules focus on acute and chronic pesticide exposure and identify strategies for recognition and prevention of these exposures in the pediatric population. The course is available in the PEHSU National Classroom.

As part of the PEHSU Webinar Series, ACMT recently hosted a Journal Club in February that discussed major water contamination incidents in the US, along with potential risks related to water contamination and the public health response to such incidents. The Flint, Michigan, water contamination situation was highlighted in the discussion. The webinar, The Public Health Response to Large Scale Water Contamination, was presented by Stormy Monks, PhD. of PEHSU Region 6. The webinar series also included a Case Conference in March, The Aliso Canyon Gas Leak: Public Health Roles and Responses presented by ACMT member Cyrus Rangan, MD, FAAP, FACMT from PEHSU Region 9. Both webinars are available on-demand in the PEHSU National Classroom.

ACMT Online Directories
If you have not been on the ACMT website recently, it has gone through some significant changes over the last several months. One of the newest changes has been to the ACMT Directories:

Inpatient and Outpatient Directories
Clerkship and Fellowship Directories

These directories allow the public to search for a provider or program on the ACMT website by city or state. An exciting enhancement is that ACMT members now have the ability to add or update their listings through their ACMT Member Center profile. If you are a service provider or program director, please review your information in the appropriate directories to make sure it is up to date. If your information is not listed, you may add it by logging into your ACMT profile.

Please click here for a PDF on how to update or add your listing on the website.

If you have any questions regarding the ACMT directories, please don't hesitate to contact us at info@acmt.net.

Meet the Team

Lizzy Nguyen
Lizzy joined ACMT in June 2015 as the the Program Coordinator for the PEHSU program. Her responsibilities include providing administrative, logistical, and database support to the PEHSU program. She brings in her experiences in program implementation and evaluation of maternal and child health programs. She's worked on projects such as program coordination and outreach for the Louisiana Healthy Homes and Childhood Lead Poisoning Prevention Program and evaluation of Nurse Family Partnership and Parents as Teachers program with the Louisiana Public Health Institute. Prior to her public health career, she's spent time working in the lab at a fertility clinic.

She received her MPH with a concentration in Community Health Sciences at Tulane University School of Public Health and Tropical Medicine. She attended James Madison University and obtained her BS in Biology and Biotechnology. Originally from the Northern Virginia/DC area, she currently lives in New Orleans enjoying everything the city has to offer.
