

October 8, 2018—Join the American College of Medical Toxicology (ACMT) at the 2018 Seminar in Forensic Toxicology 'Opioids, Toxicology, and the Law: Medical-Legal Aspects of the Opioid Epidemic' on Thursday, December 13, and Friday, December 14, 2018, in Dallas, TX.

This two-day course will focus on the forensic and medical-legal aspects of opioid use, abuse, prescribing, and addiction by presenting real cases encountered by medical toxicology experts. The seminar will be tailored to the interests of physicians and other professionals involved in numerous disciplines, including medical toxicology, forensic and laboratory medicine, addiction medicine, and the legal community.

The course will feature some of the most experienced medical toxicologists, medical officers and attorneys in the country discussing the following topics:

- Acute Opioid Toxicity
- Driving and Workplace Impairment
- Post-Mortem and Laboratory Issues
- Opioids in Court
- Use of Opioids in Pain Management and Addiction Therapy
- Challenges of Criminal Cases

This unique and timely conference will benefit physicians, pharmacists, nurses, scientists, social workers, attorneys, law enforcement and public health specialists.

Register early and save! Early bird rates expire on November 10, 2018.

The University of Alabama School of Medicine will provide continuing medical education for physicians. Visit webpage for details.

ACMT—Advancing the Toxicologic Care Patients and Populations
The American College of Medical Toxicology (ACMT) is a professional, nonprofit association of more than 700 physicians with recognized expertise in medical toxicology. Medical toxicology focuses on the diagnosis, management, and prevention of poisoning/toxicity and other adverse health effects resulting from medications, chemicals, occupational and environmental substances and biological hazards.
