Who We Are
What We Do
Founded in 1993, the American College of Medical Toxicology (ACMT), is a professional, nonprofit association of physicians with board certification in Medical Toxicology and other professionals with recognized expertise in the specialty.

ACMT members practice in clinical, academic, government, and public health settings, and provide poison control center leadership.

MISSION STATEMENT

Advance the toxicological care of patients and populations; advocate for the specialty of medical toxicology

VISION STATEMENT

Every patient and population benefits from the expertise of medical toxicologists

GOALS

Goal 1 Improve the toxicologic assessment, treatment, and care of patients and populations in the United States and Internationally

Goal 2 Enhance membership value and engagement

Goal 3 Ensure ACMT is a highly valued, relevant, and sustainable organization
**ACMT Values**

**Advocacy** – Advocate for the care of all toxicologic patients and individuals including those most vulnerable

**Education** – Promote and sustain continuous learning and competency in medical toxicology; serve as the education leaders for other health care providers and the public

**Global Health** – Advocate for the specialty of medical toxicology globally. Collaborate with health care providers globally through education and research

**Health Equity** - Ensure that all patients especially those most vulnerable -- socially and economically disadvantaged -- have access to quality health care

**Innovation** – Lead change in the field of medical toxicology

**Integrity** – Be ethical, transparent, and evidence-informed in our communications with our patients, the public, and other health care professionals

**Leadership** – Guide change and exemplify excellence that will chart the course of medical toxicology

**Membership** – Provide our members with mentorship and high-quality benefits and encourage diverse practices and career fulfillment

**Patient Care** – Provide high quality direct patient care in a variety of clinical settings

**Research** – Create research opportunities that yield new toxicologic knowledge and translate it into clinical care and improved health outcomes for individuals and populations
Founded in 2010, ToxIC is a multicenter toxico-surveillance and research network under the auspices of ACMT. ToxIC has been managing and adapting its registry to serve as a database for public health surveillance and emerging exposures within the field of toxicology.

Data collection includes information on drugs of abuse, pediatric marijuana and opioid exposures, envenomations, plant and mushroom poisoning, fentanyl analog exposures, and adverse drug events to COVID-19 treatments.

Current ToxIC projects are funded by the NIH, CDC, FDA, and corporate contracts.
The Journal of Medical Toxicology is ACMT’s international, medline-indexed, peer-reviewed journal.

Published quarterly, JMT is dedicated to advancing the science and practice of medical toxicology by publishing original articles, illustrative cases, review articles, and other special features.
The Medical Toxicology Foundation (MTF), a 501(c)(3) nonprofit organization, is the charitable arm connected to ACMT.

The MTF began operations in 2009 and provides research, education and practice grants and conference-related travel awards.

Courses & Conferences

ACMT @ NACCT2023 -Montreal

ACMT Activities Include:

- September 29th
  - Pre-Symposium: Bioethics & Medical Toxicology

- September 30th
  - Scientific Symposium
  - Practice Symposium
  - FIT Roundtable
  - FIT Visiting Prof Lecture

2023 ACMT Virtual Seminar in Forensic Toxicology: Expanding Worlds of Cannabinoids & Polydrug Exposures

- December 14 -15

Save the Date!

2024 ACMT Annual Scientific Meeting & Symposia

- AACT Symposium | April 10
- ACMT Symposium | April 11
- Main Meeting | April 12 - 14

Omni Shoreham Hotel, Washington, DC
Pathways to Building & Sustaining a Medical Toxicology Practice

Lead by experienced active medical toxicologists from a variety of practice settings, this on-demand workshop features panel discussions comparing the most common hospital-based, non-hospital-based, and non-clinical practice models, plus presentations on additional topics of interest, including adding addiction medicine services to a medical toxicology practice, hints and tips for contract negotiation, the basics of medical billing and coding, and the need for additional research on medical toxicology practice.

ACMT Communications
Be sure to set your spam mail settings to mark "@acmt.net" emails as safe so you don’t miss out!
ACMT’s Annual Year in Review publication shines a light on organizational and member activities, honors, and accomplishments. Read about new initiatives, opportunities and collaborative projects, conference and education highlights, award winners and grantees, new members, FACMT inductees, outstanding voluntary service recognition, and more!
Get Involved
The MTFITA promotes excellence in patient care, enhances the education and professional development of physicians training in medical toxicology, provides a network among fellows-in-training for enhanced communication and camaraderie, and strengthens involvement in ACMT during the transition to community toxicology practice.

The "Tox is Calling Me" video and podcast series is created by and for Medical Toxicology FITs in collaboration with the ACMT's Recent Graduate Section.

**ACMT Hosted Fellow-in-Training Social Events at ASM & NACCT**
The ACMT Board of Directors FIT Program is intended to introduce the fellow to the process of board governance, non-profit budget construction, and activities of the College.

The appointment provides a unique networking opportunity with medical toxicology leaders from around the country and provides a strong voice for a fellow-in-training member, reflecting the concerns of the next generation of medical toxicologists.

Next Application Deadline: January 1, 2024
The ToxIC FIT Program is intended to introduce the fellow to the process of organizing, designing, and administering a large multicenter research and surveillance program.

**Current ToxIC projects are funded by the NIH, CDC, FDA, and corporate contracts.** This opportunity provides a unique networking opportunity with leaders in the medical toxicology research community and to be involved in research projects, including potentially at the co-authorship level.

Next Application Deadline: January 1, 2024

Hannah Spungen, MD
2023-2024
The fellow-in-training appointment to the Editorial Board of Journal of Medical Toxicology is intended to introduce the fellow to the process of peer review, editing, and publishing of medical research manuscripts.

The appointment will provide the fellow with an experience that will enhance their career in medical toxicology and in scientific publication and develop skills that could lead to later participation as a peer reviewer or editorial board member for a scientific journal.

Next Application Deadline: January 1, 2024

The ANTIDOTE Institute

Sponsored by
ACMT, The ToxInnovation Lab (UMASS),
and The Chai Lab (Harvard Medical School)

A year-long opportunity consisting of focused, small group sessions with moderated peer review and mentorship, and light didactics of core topics surrounding research fundamentals as well as one-on-one mentorship from an established investigator in medical toxicology.

How to Join ACMT

Apply at acmt.net/membership

You must...

- Be a physician
- Have completed a residency training program in a primary medical specialty
- Be enrolled in a training program in medical toxicology that has been approved by the ACGME

...to be eligible to become a Fellow-in-Training Member.
