

The Department of Emergency Medicine at Atrium Health Carolinas Medical Center and the Wake Forest School of Medicine in Charlotte, NC is seeking a Medical Toxicologist and Emergency Physician to join our faculty.

The Department of Emergency Medicine's vision is to lead and shape the future of emergency medicine. Our mission is to elevate and integrate clinical care, education, and research in service to our community for the betterment of our patients. We believe that a strong faculty group is one that celebrates the diversity of its members and operates with emphasis on belonging. Our faculty staffs the Carolinas Medical Center and Levine Children's Hospital Emergency Departments, both are academic, tertiary care level I trauma centers serving a combined total of over 100,000 patients per year.

The Medical Toxicology division runs an active inpatient consult service, outpatient clinic and has a fully accredited fellowship training program in Medical Toxicology. We provide toxicology education for our 3-year EM residency program and PEM fellowship program, as well as medical students, EM residents, PEM fellows, pharmacy students and residents from other programs in the region. The division is deeply committed to advancing the subspecialty of medical toxicology and is seeking candidates that share this commitment, as well as have a passion for patient care, research, and advancing toxicology education.

The candidate will become a full-time faculty member with an appointment at the Assistant Professor, Associate Professor, or Professor level without tenure at the Wake Forest School of Medicine. Academic rank at the time of the appointment is commensurate with the candidate's experience and qualifications.

Faculty educators in our department mentor and teach a diverse group of learners in emergency medicine, pediatrics, various emergency medicine fellowship training programs, medical students from the Wake Forest School of Medicine, as well as international trainees from our global health partner sites. Faculty members also engage in service to the department and community to promote the health and well-being of our patients. Faculty members serve as physician leaders of a multidisciplinary emergency care team including nurses, respiratory therapists, clinical pharmacists, child life specialists, and social workers in the Emergency Department.

Charlotte is a growing, welcoming community in a bustling city just a few hours from the North Carolina coast and the North Carolina mountains. Atrium Health is now part of Advocate Health, the third largest non-profit healthcare system in the country. Advocate Health offers tremendous opportunities for physicians and encourages applicants with diverse backgrounds and skillsets.

"We should celebrate our differences because of the richness they bring to human experience." Gene Woods, President and Chief Executive Officer of Advocate Health

In 2025, the Charlotte campus of the Wake Forest School of Medicine will induct its first medical school class. The new medical school is housed in Charlotte's emerging innovation hub called the Pearl.

Furthermore, we, the Faculty of the Department of Emergency Medicine at Carolinas Medical Center, believe in and strive for an inclusive and equitable work and learning environment - FOR ALL. We affirm that diversity advances us toward solutions for the betterment of our team, our patients, their families, and our local and world communities. These principles will guide our daily work and influence everything that we do, including:

- Our professional interactions with staff, colleagues, and each other
- Our recruitment and development of future faculty
- Our selection, education, and evaluations of learners
- Our pursuit of scientific discovery
- Our commitment to lead and advance our specialty, and foremost... the compassionate care of our patients and their families.

Qualifications:

Applicants must have an MD or DO (or foreign equivalent) and must be board certified or board eligible in Medical Toxicology and Emergency Medicine as well as eligible for licensure in the state of North Carolina. Medical Toxicology experience or completion of a fellowship is required. Applicants should have the ability to mentor and teach a diverse learner group and treat a diverse patient population.

If you are interested in applying, please reach out to Dr. Michael Runyon at Michael.runyon@atriumhealth.org.
